Reports and Statistics

Where can I get a list of items that are most heavily requested through Prospector?

The III Title Reports allow you to generate a report by a specific time frame (Month to Date, Last Month, YTD, or MTD) for lending and borrowing fulfillments, requests and loans for any Prospector library. These reports provide detailed information about items including titles, ISBN/ISSN, publication date and more. They also provide the lending and borrowing library and pickup location. These popular reports are a great tool for collection development.

You can access the reports at: [http://prospector.coalliance.org/iii/inreach/secure/TitleReports.html](http://prospector.coalliance.org/iii/inreach/secure/TitleReports.html)

contact the Alliance for the login.
