What is the schedule for the Prospector reconciliation process?

Here is the general schedule as outlined by the Chair of the committee:

- September: Local libraries create lists of items due in previous calendar year and search their local collections. (We realized last year that some of the documentation online indicated this list was to be generated by the time of the July Doc Delivery meeting – which is incorrect).
- Early October: Lists of items not located at local libraries are compiled into one search list and distributed to all Prospector libraries.
- October – December: Searching of local collections for non-local items.
- Early January: Final results compiled and reported.

For more information about the reconciliation process see:
