Paging and Holds

How do I retrieve a deleted hold slip?

There’s not a way to reproduce the full Prospector paging slip notice. However, if you have the book in hand you can simply check it in and the system will prompt you for a Prospector hold and give you an option to print a slip. It looks different, but does the job in a pinch.

If you don’t know what items need to be pulled, you’d have to create a list in the system of items with status "Prospector paged" in order to determine which items have been requested.

If you print with the option "queue for later printing", then the "regular" paging slip is printed.
