Borrowing Policies

Is there a reason for us to have CRL patron types in our p-type table if we don’t borrow/lend to them through Prospector?

You do still need the CRL patron types, regardless of whether you borrow from CRL, because the patrons at institutions that do borrow from CRL have those patron types. For example, I believe CU is a CRL member, so their undergraduates have a patron type of 231 for Prospector transactions.

So you should have the CRL patron types in your patron type table, and they should be included in the patron type section of the loan rule determiner table entries for your Prospector loan rules for loans to another institution (item is yours, patron is at another Prospector library).
