Borrowing Policies

How many items can I checkout in Prospector?

A patron can have up to 70 items checked out on Prospector. This includes items checkout, holds and items that haven't yet been checked back in. This does not count your local holds, but if you have a local hold limit it will count Prospector requests when they’re still in a “Requested” status. For instance, with my hold limit set at 100 I would be blocked from Prospector requesting if I already had 100 local holds; I would also be blocked if I had 95 local holds and 5 Prospector requests.
