PASCAL
What is Pascal?
PASCAL -- the Preservation and Access Service Center for Colorado Academic Libraries -- is a high-efficiency storage facility at Fitzsimons funded by the Colorado Legislature. It represents an important public-private partnership, helping to reduce library operational costs for the Auraria Library at UCD, Denison Memorial Library at the HSC, UCB Libraries, and the libraries of the University of Denver. These partners will transfer valuable but low-demand research materials to PASCAL for space-efficient storage in a temperature and humidity controlled environment. See: http://ucblibraries.colorado.edu/about/pascal.htm.
