Peer to Peer

How do I get lending/borrowing statistics for MOBIUS?

The Prospector fulfillment report includes the number of items that the MOBIUS libraries have borrowed from each Prospector library. The final column on the spreadsheet, “Peer not in total”, is the number of items the peer system (MOBIUS) has borrowed from your library. Currently, there isn't a way to see which libraries in MOBIUS have borrowed items from your library; there is only a lump sum total. MOBIUS will share their fulfillment reports with the CO Alliance. Their reports will show the number of items Prospector libraries have borrowed from a given MOBIUS library. There isn't currently a way to see the individual libraries in Prospector that have borrowed items from MOBIUS.
