Borrowing/Lending

Will Prospector place holds on items that are already requested?

It's very normal for holds to be placed. Usually the hold will go on the item that has the closest due date, but that doesn't always happen. It's a good idea to review your "Requested too long" report so that you can see what items your patrons are requesting that aren't getting filled. Often these are items with lots of holds or items that aren't held by many libraries.
