Paging and Holds

Can anyone tell me what it means when a Prospector item is given the status "Prospector Re-Requested"? Do I need to place the hold again?

This just indicates that the first owning library canceled the hold, perhaps it wasn't on the shelf or has an extended due date, and the system sent the request on to another library. It's not new, but we don't notice it very often. You don't need to create a new request for the patron.
