Paging and Holds

How do I retrieve a paging list that I accidentally deleted?

You can figure out which items you should pull by creating a list of items with status “Prospector paged”. When you have the items in hand, you can check them in and at the prompt, request that the paging slip be added to the printing queue. Then you can print the paging slips again through the regular process and you’ll have slips to send with the books.

You can also take a look at the attached instructions from Fraser Valley Library on how to retrieve lost paging slips.
