The typical ways to find Prospector overdues that my patrons have doesn't work. Is there an alternate method?

If you do not use the Home Room field you can update all of your patron records to have a Home Room of "library name". Then, in Millennium Circulation, click on the Overdues Report on the sidebar and run that report.

**The pros:** You can finally see what Prospector items are overdue!

**The cons:** You can't narrow the report down at all to a specific patron type, item type, or time limit, and you can't customize the report to show things like call numbers. You will have to go through the report looking for the specific items you are interested in.

**Note:** Marmot libraries don't have access to virtual records so this method may not work for them.
