Library Codes

How can I change the circulation status of an item e.g. available/not available?
The following link to Prospector INN-Reach Circulation Status Codes may be found under the Doc Delivery Committee tab on the Prospector Staff Page: https://www.coalliance.org/sites/default/files/circulationstatuscodes.xls

You should map your local circulation status codes to the corresponding central status codes. The hyphen “-“ indicates available. All other codes indicate not available, for example, missing, or local use only, etc.

Unique solution ID: #1037
